```
def tech_lead
  "One who leads technologists"
end
```

Manager == What ?
Tech Lead == How ?

What is the output of a developer?

```
def developer_output
  "a piece of working code written according
    to explicit or implicit specification that
    accomplishes some task"
end
```

What is the output of a tech lead?

```
def tech_lead_output
  her_own_output +
  output_of_people_under_her_influence
end
```

```
def tech_lead_output
  leverage_x * activity_1 +
  leverage_y * activity_2 +
  ...
end
```

High leverage activities

When many people are affected by one tech lead

When a person's activity or behavior over a long period of time is affected by a tech leads' brief, well-focused set of words or actions

When a large group's work is affected by an individual supplying a unique, key piece of knowledge or information

When I think of a 10x engineer, I think of good use of managerial leverage.

Remember, you have the same number of hours in your day as Beyonce.

Thanks for listening.
